---

This is by far one of the easiest cameras to set up and install. Actually has a good picture and i love watching my house and dogs when we are not home. Have two trying to buy two more.

---

So far these cameras seem to be working well.I replaced Dropcam cameras since these work with my security system.They are, however, quite a bit larger than the Dropcam's.The picture quality seems good.There are many features that can be accessed through the alarm.com website.

---

According to the specs, this camera is supposed to work with systems other than Alarm.com Well GOOD LUCK WITH THAT. About the ONLY thing I can do, is get it to see an IP address. I can't connect into that IP, can't access the camera and there IS NO DOCS on this camera besides log into your alarm.com account This leads me to say that, you can't use this camera with ANYTHING but Alarm.com See all 8 customer reviews...
